

MHSD Covid Quarantine Guidance (*updated Jan 18, 2022*)

- Positive cases quarantine for 5 days from either the start of symptoms or a positive test and may return on day 6 with improving symptoms or a negative test.
- No quarantine required for those exposed to COVID at school or school events.
 - If there is a school exposure, parents are to be notified if the student was a close contact.
- Covid exposure in the home should follow the same 5 day quarantine if they are isolated from the positive case. If they are unable to isolate then 10 day quarantine or negative test after day 5 to return to school. (*The quarantine for the exposure starts at the onset of symptoms or positive test of the COVID positive individual.*)

Masks are recommended for those returning from a 5 day quarantine for the additional 5 days, but they are not required.
