

Stephensens Elementary

Stephensens Elementary is introducing Minecraft as an after school program.

When it will take place?

Minecraft will be held in the Computer Lab on Wednesday and Thursday from 3:00 pm – 4:00 pm.

Who is eligible?

Students in grades 1 and 2; but it may be opened up to other grade levels later.

Benefits of Minecraft:

Minecraft has become very popular in the past few years. Stephsens is excited to introduce it as a learning elective. Minecraft is great for encouraging and motivating kids to learn. Along with this, it boosts creativity, encourages problem-solving, develops logical thinking, and promotes an awareness of surroundings.

Please discuss this opportunity with your student and let us know if he/she would like to participate by signing the permission slip below and returning it to your teacher. There is limited space available. The program begins January 31.

Thank You,
Mr. McCluskey & Mr. Martin

Yes, my child _____ would like to take part in Stephsens Elementary Minecraft Afterschool Program.
